680D Network Player/600i v2 Integrated Amplifier

To celebrate our 40th anniversary we have created a truly iconic audio system. The stunning MOON Anniversary Edition features our highly acclaimed 680D streaming DAC and the elegantly powerful 600i v2 integrated amplifier.

With an exclusive production run of just forty systems, the Anniversary Edition is designed for the passionate audiophile who wants to own an exclusive part of MOON's audio heritage. The 680D and 600i v2 combine to produce an unforgettable listening experience featuring all the hallmarks of the classic MOON sound.

Both models are finished in a beautiful Millesime Red colourway, designed to give a contemporary look with a discreet styling cue recalling MOON's 1980 genesis. They each feature a commemorative plate engraved with the MOON logo and individual serial number, painstakingly painted in complementary luxe rose gold.

The Anniversary Edition also includes a remote-control unit in Millesime Red, plus a full set of MOON bridges and premium cables. The units and accessories are all presented in a robust custom road case featuring stunning steel shoulders and wood finish side panels.

Owners of this statement system will be delighted by both its appearance and performance. The MOON 680D streaming DAC is a complete and modern high-end listening solution and the MOON 600i integrated amplifier is an ideal partner as it delivers the true power and emotion of music with its fully differential dual-mono design offering finesse and superb control.
